

Private Lending Centers USA

How Your Private Lending Center Works

Right now, the lending source for your vehicles gets 100% of your Principal, 100% of the interest and 100% of the profit. All you get is a depreciated vehicle when the loan is paid off. Do you think that is a good deal?

- Pay cash for the things you need
- Rebuild your cash by making monthly **equity** payments back to **yourself** instead of making loan payments to the bank
- At the end of the typical financing term, you have all your cash back and you still own the vehicle you purchased.
